

Legal Counselling to Public Companies

The needs, demands and goals of public companies change as they continue on their corporate journey. ZAG's wealth of experience in capital markets provides both reassurance and immediate impact, whether it relates to day-to-day counsel or specific transactions.

Clients benefit from our long and successful track record in representing publicly-traded companies in their mergers, acquisitions, equity or debt offerings to institutional and public investors, tailoring our advice to provide the most strategic input on the best course of action.

We are often the primary destination for some of the larger and more prominent public companies in Israel, advising on their offerings, while consulting them closely in relation to their reporting requirements and all regulatory advice.
