

Companies Dual listing

Selecting to list on the stock exchange of two countries carries both tremendous opportunities and inherent risks. Clients benefit from working closely with only the most experienced lawyers, with the deepest understanding of international capital markets. ZAG is that partner.

The technical complexity involved and understanding of securities laws around the world is vital to clients looking to dual-list, whether it is in the U.S., Europe, Asia or elsewhere. Our long experience in this field ensures that we are the go-to firm for public clients in relation to the equalization agreements, dividends, corporate governance and the company's management structure.

Clients benefit from the close collaboration between our Corporate and Capital Markets department and our Tax department to ensure that public clients successfully overcome this most challenging hurdle and continue to successfully grow their businesses.
